

# AMARDEEP KHUGSHAL

## Software Engineer

Enthusiastic Web Developer with a creative mindset and a solid grounding in server-side technologies and database management. Transitioning from civil engineering studies, I've set out on a path to translate my fascination with coding into practical, high-performance applications. Excited to harness my abilities, rapid adaptability, and unwavering commitment to architecting efficient and seamless systems that make a significant difference. Prepared to offer inventive concepts and eagerly embrace each chance to broaden my knowledge and excel in the ever-evolving realm of backend development.

## EDUCATION

### Study Program

Graphic Era hill university

06/2016 - 07/2020

Dehradun

#### Courses

- B.tech ( civil engineering)

## WORK EXPERIENCE

### Node js Trainee

ToXSL Technologies

07/2023 - 10/2023

Sahibzada Ajit Singh Nagar, Punjab

Mobile App Development And Web Development Company

#### Achievements/Tasks

- Assisted in designing and implementing RESTful APIs using Node.js, enabling frontend functionality and interaction with the database.
- Worked with MongoDB to design schemas, set up collections, and manage data storage, ensuring efficient retrieval and manipulation of information.
- Quickly grasped complex backend concepts, including asynchronous programming and database management, enabling a smooth transition from trainee to active contributor.

### Subject Matter Expert

Anutham india pvt. ltd.

02/2022 - 09/2022

dehradun

Education and E-Learning Services and Knowledge Management

#### Achievements/Tasks

- Recognized for consistently delivering high-quality and accurate answers to complex civil engineering questions on the Chegg and Bartleby platform, earning top ratings and positive feedback from students.
- Recognized for the ability to dissect complex engineering problems and present solutions in an approachable manner, making intricate concepts more accessible to students of varying skill levels.
- have practical insights drawn from real-world civil engineering experience, enhancing the academic knowledge with industry-relevant perspectives.

## SKILLS

HTML

CSS

Java Script

Node.js

Express.js

MongoDB

Git

## PERSONAL PROJECTS

Portfolio website (09/2023 - 10/2023)

- Using Html Css and javascript.
- in html i use nav tag header tag footer tag etc.
- in css i took refence from internet also give some personal touch.
- in java script i use events like onclick.

Small Javascript Projects

- color changer : using event listener i make color changing backgrounds
- BMI calculator : in this project i make a bmi calculator which shows the range and by the help of that range we can find if we are over weight ,less weight or normal.
- Blackjack game : i took help from internet but i learn how to genrate random numbers and use events and Dom manipulation.

Blog-Post App (07/2023 - 07/2023)

- Successfully designed, developed, and deployed a fully functional blog post application using Node.js and MongoDB, providing users with a platform to create, publish, and manage their own blog content.
- Implemented user authentication and authorization mechanisms, allowing registered users to create personalized accounts, write posts, and manage their content securely.
- Leveraged MongoDB to store blog post data, demonstrating proficiency in data modeling, schema design, and effective utilization of a NoSQL database for content management.

## CERTIFICATES

Prompt engineer by Open AI (08/2023 - 08/2023)

Learn how to formulate prompts that yield accurate, relevant, and contextually appropriate responses.
